

The Oscillators – A Review

October 31, 2016

It's been a while since I have seen the Oscillators, so I thought I knew what to expect on Saturday night. I was *more* than pleasantly surprised. And inspired enough to come out of music programming retirement to write a review.

What was once an entertaining cover band has evolved into polished musical tour de force. Which is not to say they no longer do cover songs; they do. But those songs

must pass through their "caffeinated folk-pop" spin giving them a whole new vibe. They also provide their own material for your enjoyment. Three of those goodies are on their recently released EP, "Something New"

The Oscillators are talented and diverse musicians, with delightful harmonics in the vocals. They present their eclectic variety of instruments, beat boxing & rap elements into a performance that leaves the audience wanting more. It's a classic case of the whole being greater than the sum of their parts.

You would be most rewarded to consider checking them out at their next gig. You can also find them at wearetheoscillators.com or on facebook, twitter & instagram
